WE ARE REVÉE.

Italian company specialised in the production of post-operative garments for Plastic, Reconstructive and Aesthetic Surgery.

Learn more

POST-SURGICAL BRA

Our **Revée Bra** Collection offers a full solution for **post-operative recovery following breast augmentation, breast reduction, breast reconstruction.**

It combines an exclusive design, engineered with the support of world renowned plastic surgeons with the highest-standards manufacturing process. Thanks to the unique characteristics of the **Lycra®** fabric (Latex free) it ensures optimal compression while providing maximum comfort to facilitate healing and repair of the tissues and infra-mammary structures (1). Patients who have undergone breast augmentation **surgery have more success and satisfaction with their procedure when they wear a quality compression post surgical bra.**

⚠ Warnings:

■ In order to **guarantee its efficacy**, tolerability and proper use, **it should be worn with extreme care.**

■ In case of concern on the application procedure, contact the shop staff or the treating physician.

■ Choose the correct size that your specialist shop or treating physician recommends.

■ The **fabrics** used are **hypoallergenic, non-cytotoxic, and latex-free.** It is however advisable to check the

components listed on the label to rule out any allergy to the fabrics used.

■ In case a **surgical wound** is present, do not put into direct contact until complete healing.

■ **Close all the velcro and hook fasteners** before washing in order not to damage other items and to protect the shaping feature of the product.

Tip: For a better post-surgical recovery, acquiring two bras of the right size is recommended.

FACE GARMENTS

Face compression garments provide targeted compression for chin liposuction or other facial surgical procedures. They are ideal for face and neck compression after neck lifts or chin liposuction. If applied correctly, these garments will increase blood circulation around the surgical area where

the surgery has been performed, as well as reduce swelling, eliminate any harmful bodily fluids, and speed up the healing process. In case of a sudden movement (e.g. sneeze or cough), these facial garments will minimize the discomfort

REVÉE PAD

Revée Pads are worn under the garments to provide **greater compression on the treated area** following reconstructive, aesthetic or reconstructive surgery. Product available in **three different formats** with different intended uses. The pads provide a surface smooth and soft surface in contact with the skin, **improving comfort** after liposuction or after a remodelling surgery body

contouring, **help minimise the risk of haematomas**, preventing the formation of bruises and skin folds, **optimising lymphatic drainage** by providing adequate compression and helping **accelerating the healing** by preventing water retention and reducing the accumulation of fluid in stubborn areas. Also indicated for patients suffering from lipedema.

Thrombosafe®

Graduated compression (more intense in the ankle, progressively decreasing towards the calf and thigh), which restores the blood circulation speed to normal levels in leg veins.

Thrombosafe® stockings stand out for their premium quality and reliability: gimped latex-free elastomer yarn covered with a protective sheath, for **excellent skin tolerability**. Elasticated edges with soft seams. The **inspection hole** allows the doctor to conveniently check the foot. Anatomic, seamless, enveloping and soft heel. Elastic non-slip band applied in the extremity preventing the stockings from going down and keeping them in the correct position. **LATEX FREE** fabric, resistant to the use of skin creams, ointments, and sweat

Composition: 80% Nylon
20% Lycra
Washing:

How to choose your size

To choose the right size for the patient, measure the limb circumference (CB, CD, CG) to determine the stockings' width (SMALL, MEDIUM, LARGE, XL). Then measure the length of the limb (iD or iG) to determine the stockings' length (short, standard, long). The colour facilitates the choice of the size and length. Twelve sizes available for each type of stockings, to ensure a correct fit for the patient's body.

Medical silicone
Odourless
Without parabens

CE

Silicone gels are the first treatment recommended by international guidelines to cure and prevent hypertrophic scars and keloids. (4)*

In the best pharmacies and healthcare shops

REVÉE®

SCAR GEL

REVÉE®

SCAR GEL

It reduces redness and itching, while improving the aesthetical aspect. The scar becomes smoother and more elastic.

Odourless.

Quick-drying silicone protective film.

TREATMENT FOR SCARS RECOMMENDED BY PLASTIC SURGEONS

It is indicated for the treatment and prevention of hypertrophic or keloid scars caused by a burn, a surgical procedure or trauma.

It is also used for immature and red scars in relief during the active healing phase.

How to use:

- 1 Clean the area to be treated. Then dry by dabbing;
- 2 Apply a thin layer of Revée Scar Gel. Do not massage;
- 3 After Revée® Scar Gel is dried you can apply: makeup, cosmetics or sunscreen;
- 4 Apply twice a day, morning and evening for at least 2/3 months.

Ingredients: Cyclopentasiloxane, Cyclohexasiloxane, dimethicone/vinyl dimethicone crosspolymer.

REVÉE SUPPORT.

CUTE PROJECT
ONLUS

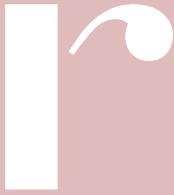

Cute Project Onlus was founded in 2012 with the aim of offering theoretical and practical training to health personnel in developing countries, in the field of plastic reconstructive surgery, with specific address for the treatment of burns and their outcomes.

In recent years he has carried out several training missions in Africa, Congo, Benin, Uganda and started collaborative projects with the Serming of Turin and several Piedmont schools.

- It carries out **humanitarian training missions** for doctors and other local health figures through theoretical and practical lessons in the operating theater.
- **Establishes scholarships in Italy**, aimed at health personnel in developing countries and aimed at completing the process of acquiring specialist skills.
- It carries out health and educational activities for people in difficulty on the national and regional territory.

**REVÉE
SUPPORT.**

The Diastasis Women's OdV Association arises from the common effort of a group of mothers affected by diastasis of the abdominal rectum. The purpose of the Association is to inform as much as possible about this pathology, which is unfortunately still unknown today. Through events, collaborations, meetings, medical conferences, wants to give importance of women's health. Through the site and social accounts, they **support women on their journey, from diagnosis / self-diagnosis to post-surgical**, divulging practical and correct

information, which they make available thanks to doctors and professionals who work for free on their side. They organize awareness campaigns to recognize the pathology and treatment by the National Health Service in all Italian Regions. **They provide assistance, psychological support and guidance to women who ask for help.** They help women in post-partum, in choosing the most appropriate treatments for diastasis and for strengthening exercises, creating cooperation with professionals from all over Italy.
